If your car has a "cancel" cruise control switch, you can also press that to stop it. 5 Relot the cruise control, if you want. Sometimes you just need to turn off the control of cruises momentarily, like while you stop a car in front of you. When you are ready to return to cruise control, return to (or close) your desired speed and press the "res" boton. This will put your car again in the cruise control, at the speed that you established previously. [6] 6 Change the cruise control speed when necessary. For example, perhaps you have been driving with the cruise control on a road where the speed lys km) per hour. Just press the gas pedal to take your car at the new speed, and hit the "set" boton again. This will establish cruise control at the new speed. If your car has a +/- Botiners for cruise control, press this when you want to increase or lower the speed of your car. Announcement 1 Cruise control reserve for the open road. Cruise control is really intended to be used in situations where you can lead mainly without stopping or stopping. [7] It is ideal to drive on highways and roads. Using cruise control while driving in the busy streets of the city makes no sense, due to the stop and the beginning that will have to do. [8] Using cruise control in busy streets can also be dangerous. Since you are not in full control of your car, you may be paying less attention. You can stop or react to other cars slowly from normal, increasing the probability of an accident. 2 Avoid using cruise control in sadaven sadaven o sadem⁰Âh sareterrac :neyulcni sotsE .adazitam y asodadiuc s¡Âm n³Âiccudnoc anu nereiuqer areterrac ed senoicidnoc sal euq sal ne senoicautis ne olrazilitu on rojem se euq acifingis otsE .n³Âicareleca al erbos latot lortnoc renet edipmi el y n³Âiccaer ed opmeit us etnemaregil rasarter edeup sorecurc ed lortnoc lE .sasorgilep Steep or mountainous windings sinuous 3s stay focused on the road. Cruise control is not self-pilot. You still have to stay focused on the way. Exhax the road constantly to know the next risks or other vehicles. Keep your feet near the brake pedal at all times (not folded under you in the seat or supported by the board) in case you need to slow down or stop. Above all, keep your mind in driving: Don't turn on! [9] 4 Use cruise control to maximize the fuel economy and make sure you maintain a safe speed. The engine of its automvile works more efficiently under conditions in which cruise control is safely dedicated. Since you can configure it at a specific speed, it is also a way to avoid obtaining a speeding ticket if you have a lead foot. I simply set it up at or below the speed of speed! Finally, cruise control allows you to relax a bit as it drives, which can reduce fatigue on long trips. [10] Add New Question Question What is bad to use cruise control?
